

Fishing Report for week of 11-15 September, 2006

Guests: Bill Laidlaw, Gerry Smith

Weather: Hi 15C; Lo 0C. Some beautiful sunny days with cool temperatures.

Rivers fished: Bell Irving

Our first guests of the season were treated to great weather and excellent water conditions. The early season fishing was some of the best we have ever experienced. With plenty of fish around in all species types the catching was fantastic.

With only two rods on the water we were able to hook 10 steelhead in 4 days. Exceptional Coho fishing and plenty of Bull Trout made for consistent action.
